We invite you to join us for a special educational event...

“The Oncology Care Model and Value Program Summit”

Now in its third year, the Oncology Care Model is a 5-year voluntary pilot program developed by the CMS Innovation Center that aims to provide high-value cancer care. The program incentivizes practices by moving from fee for service to a value-based program that considers quality and total cost of care. At the same time, similar programs have been introduced to include innovative ways that payers are responding.

The Association of SC Oncology Managers and the SC Oncology Society invite you to attend a one-day conference to hear from experts on the current and future state of the Oncology Care Model, other Value models, the role of biosimilars, and a first-hand report from those practices that are involved in one of the various pilot programs.

Date: Time: Location:

Tuesday, December 3rd, 2019 9:30 am to 3:30 pm Doubletree by Hilton
2100 Bush River Rd Columbia, SC 29210
